

PRESS RELEASE

Romagnat, the 5th of October 2023

Improving working conditions with AMR

- **A social approach : providing operators with better tools and better working conditions**
- **Users feedback**

Effidence robotized solutions for Man's benefits

Effidence places the well-being of operators at the top of its priorities. With its robotic solutions, the company helps them with their daily tasks in industrial and logistics sites. Thanks to these autonomous mobile robots, Effidence is able to provide operators with effective support, avoiding the need to handle heavy loads and make unnecessary journeys (up to 15 km/day).

Users feedback

LA BOULE OBUT, manufacture of petanque balls

Head of Quality and R&D Production : "EFFIDENCE robot is extremely reliable and provides us with the comfort we expect on a daily basis. Autonomous, precise and easy to use, the EFFIBOT robot helps us every day to handle our heavy products. The arrival of the mobile robot has enabled us to increase the speed and ergonomics of bin loading.

Autonomous, precise and reliable, the EFFIBOT robot will relieve your daily workload. Flexible and intuitive, it will follow you (Follow-me) throughout the warehouse, no matter what obstacles you put in its way!

DHL USA, world leader in transport and logistics

Head of Operations : « Everyone feel safe and comfortable around it, it's incredible. »

On-site construction trainer : « With the EffiBOT, wa have an opportunity to be efficient. I think people saw this well, looking ahead of the future. »

DEGRENNE, the tableware specialist

Director of flows and logistics performance : "The EffiBOTs were quickly adopted by the logistics team as soon as they arrived.

They provide better working conditions, eliminating the need for team members to make journeys with no added value, as well as the productivity generated by working differently. The staff would never go back. Our EffiBOTs are now part of our company".

The luxury perfume manufacturer SOCOS SERVICES

Sales, Logistics and Planning Manager :

"This new member of staff has integrated perfectly into our environment, helping to relieve the workload of the forklift drivers in the logistics department on a daily basis.

BMW, famous German car brand :

Production Manager :

"The robot makes it easier to assemble the lines. Handling is intuitive and the process is fluid. The processes are quicker and the physical workload on the employee (manual pulling) is reduced. Effidence' robots offer us a pleasant work relief and are perfectly suitable for small production lines.

About Effidence

Effidence provides innovative robotic solutions to optimise intralogistics flows and order picking applications for players in industry and logistics. Founded in 2009, Effidence offers agile and powerful robotic solutions that adapt to the needs of its customers and their growth: collaborative "follow-me" and autonomous robots to work with or near humans; standalone robots or cooperating fleet type "swarm-me". In 2020, Effidence signed a strategic partnership with the Manitou group to distribute EffiBOT robots in Europe and market Manitou warehouse trucks (stackers, tractors, order pickers, etc.) robotised using Effidence technology.
