

Shaped Trailers

Range of customizable and safe trailers for **EffiBOT**

Shape Trailers

Shape Trailers is a range of trailers for the **EffiBOT** robot.

These trailers are designed to provide reliable and accurate tracking of the trajectory of the **EffiBOT** tractor (**single-track trailer**).

Like **EffiBOT**, **Shape Trailers** stands out for its flexibility and customer adaptability: customize the volume, shape and number of floors to suit your needs.

Follow-me 360° technology is available with this configuration, in forward direction only.

Range of trailers

FlatShape

C-Shape

FlatShape

Single-track trailer with customizable platform

FlatShape is a single-track trailer with a customizable platform.

Cinematics:

- 2 steering axles
- Fixed wheels, **200 mm** diameter.
- Turning radius : **1,2 m**.
- Speed : **1,7m/s**.

To know: Reverse gear is not available with a single-track trailer.

- Loading surface : **1200 mm x 600 mm**
- Weight of the empty trailer : **90 kg**
- Maximum charge : **400 kg**
- **Design an upper structure and insert it into the 4 sleeves of the trailer.**

✓ Other possible configurations.

C-Shape

Single-track trailer to transport rolls

C-Shape

C-Shape is a single-track trailer for roll transport.

This trailer is designed in a C-shape, which allows it to accommodate a roll to move it.

The roll is held inside the trailer by a double lock.

Cinematics:

- 4-wheel steering
- Turning radius : **1,3 m.**
- Speed : **1,7m/s.**

To know: Reverse gear is not available with a single-track trailer.

C-Shape

C-Shape :

- Weight of the empty trailer : **100 kg**

Standard Roll :

- Max. load: up to **300 kg**
- Weight of the empty roll: **80 kg**
- Crazy wheels.

Single-track feature

Our range of trailers is optimized for **EffiBOT** right from the design stage.

The **single-track** feature allows a trailer to follow the trajectory of **EffiBOT** perfectly, especially when cornering.

Single-track feature

Installation

You must be equipped with an **EffiBOT** with the towing option (**black docking base (1)**), in which the **yellow towing bracket (2)** is fixed.

Choose your **Shaped Trailers** configuration :

- **FlatShape**
 - Loading area
 - Number of floors
- **C-Shape**
 - Size of your roll

The drawbar of the trailer must be manually hooked into the **towing bracket**.

Benefit from the loading volume of our **EffiBOT** and that of the customized trailer.
